Rapid Commun. Mass Spectrom. 2007; **21**: 1721–1728.

DOI: 10.1002/rcm3013

For both PG and PE, the product ions noted as $[M-H - RCHCO - H_2O]^-$ on page 1724 (paragraph 2) and in Table 1 page 1725 should more probably correspond to

$[M-H - RCH_2CO_2H]^-$ ions which have been previously described in the literature by several authors (references 12 and 15 in the text and additional references 39 and 40).
